ISSUANCE

## S3600

BEST IN CLASS INSTANT ISSUANCE SOLUTION

**The Matica S3600 is the most comprehensive desktop solution to issue high-quality printed and embossed credit and debit cards instantly, at a branch level. It is also the ideal solution to fit smoothly in multiple self-service kiosk designs thanks to its compact size and front operation.**

Based on in-house technologies which are globally well known as a symbol of robustness and reliability of Matica systems for the financial market, the S3600 is the result of several years of experience in developing payment-card issuance solutions.

Matica S3600 offers full-color direct-to-card printing, embossing and indenting personalization combined with magnetic and chip encoding (contact/contactless) for EMV® compliant issuance. The system is fully scalable and the automatic feeder can be upgraded to six hoppers of 100 cards each for a total capacity of 600 cards with up-to six different pre-printed designs.

The S3600 also features a wide range of secure connectivity options, from USB to LAN with Single-Wire Functionality (Smart Class Controller) and real time cloud monitoring that allows the customer to supervise the production of all machines installed at any time.

Electronic and key-control manual locks are available as standard security features to

protect the unauthorized access to the device, both in the top cover to secure consumable access and in the back cover where cards are stocked, as well as the access to the reject hopper.

As all systems of Matica S3000 desktop instant issuance family, the S3600 includes the 'Matica Security Pack' for financial issuance, which is a comprehensive set of security features aimed at fulfilling specific requirements for financial card personalization.

The system has been designed to suit in-branch VISA® and Mastercard® security guidelines and it fully complies with international regulations in the financial instant issuance industry, with physical and logical security features.

- Three or six card hoppers
- Full color direct-to-card printing
- Embossing and Indenting
- Magnetic stripe and chip encoding
- Ideal also for kiosk applications
